Professional Summary

Sophomore Software Engineering student at FPT University with a robust technical foundation in Java and PHP Laravel. Passionate about the synergy between AI and Red Team Cybersecurity.

Proficient in Data Analysis and Machine Learning fundamentals, with hands-on experience in model evaluation and optimization using Python libraries. Experienced in building automated workflows (n8n), AI-integrated web solutions, and fine-tuning local LLMs.

Notable Projects

Sentinel – Privacy-First AI System

Python, Llama 3 (QLoRA), PyQt6, CUDA

- Fine-tuned an 8B Llama 3 model in a CUDA-optimized environment for local assistance.
- Engineered a custom GUI using PyQt6 to bypass third-party wrappers, ensuring 100% data sovereignty.
- Developed a System Control Engine translating natural language into OS-level commands.

LitraScan – AI Grading Automation

n8n, OCR, Gemini API

- Built an n8n workflow integrating OCR and Gemini to extract/evaluate handwritten essays.
- Leveraged AI reasoning to provide human-like feedback based on academic rubrics.

Technical Skills

Data Science & Machine Learning

Machine Learning

Model Evaluation

NumPy

Pandas

Data Analysis

Languages

Java

Python

PHP

C/C++

JavaScript

HTML5/CSS3

Frameworks & Libraries

Laravel

Spring Boot

React.js

PyQt6

PyTorch

JavaFX

AI & Automation

n8n Workflow

Llama 3 Fine-tuning

Gemini API

QLoRA / PEFT

Beautiful Beach – Tourism Platform

Laravel, MySQL, ReactJs, n8n, Gemini API

- Developed a tourism platform with an automated AI Chatbot for real-time support.
- Built a robust backend and smart search engine for coastal destinations.

Cognitive Robotic Arms

Python, ROS, Computer Vision

- Engineered a 6-DOF robotic arm with Computer Vision for automated package sorting.
- Increased factory productivity by 30% through autonomous operation.

Awards

Top 4 – DENSO Factory Hacks 2025

Nov 2025

Developed a Robotic Arm integrated with Computer Vision (ROS/Python), praised by DENSO executives for ROI potential.

Computer Vision (OpenCV)

Inverse Kinematics

Cybersecurity (Red Team)

Pentesting

Web App Security

Vulnerability Assessment

Linux/Windows Admin

Tools & Databases

MySQL

MS SQL Server

Git / GitHub

Docker

Postman

n8n

Education

FPT University

Bachelor’s in Software Engineering
2024 – Present

APTECH Computer Education

ADSE Diploma
2024 – Present
